Dear Legislator,

In a very short time, the Trump Administration has made it clear that our future and the future of our planet are not their concern. They have erased all reference to climate change and clean energy from the White House website and are rolling back federal regulations that protect us. They are touting "alternatives facts" as they work to double down on dirty energy.

Clean water, clean air and a stable climate are not givens and our leaders should act accordingly. We should be meeting big responsibilities and big problems head on, not acting like they aren't happening. **Plans to roll back our basic environmental and public health safeguards are moving forward at a rapid pace.** We need you to hold the line for the health of our families, our neighbors, and indeed our country.

One issue that I am very concerned about is...

Thank you for your time and for standing up for your constituents. Please do what is best for our future.

**Best Regards,
Concerned Citizen**
